

Kim Hammonds

BOARD MEMBER

Kim Hammonds is the former group chief operating officer at Deutsche Bank, where she brought significant experience in leading global teams to deliver systems development for manufacturing, service logistics, supply chain, quality, human resources, finance, marketing, and sales systems. Prior to joining Deutsche Bank, she served as chief information officer at Boeing, where she was responsible for the IT strategy, operations, processes, and more than 8,500 IT people of the world's largest aerospace company. She currently serves as a director of Midwest Board at TechAmerica; has been an independent director of Red Hat since August 2015; and is a board member at Zoom, the private cloud videoconferencing and group messaging platform company. Kim received an MBA from Western Michigan University and a bachelor's degree in mechanical engineering from the University of Michigan.
