## What is Cloudera OnDemand?

The skills gap in emerging technologies continues to grow. Does your team have the expertise needed to keep pace? Cloudera's OnDemand Training is designed to support both the enterprise-wide and individual training required to advance big data projects.

Cloudera OnDemand offers video-based instruction led by experts and access to 100 hours of cloud-based, ready-to-run lab environments that enable students to practice what they've learned through hands-on exercises.

A Cloudera OnDemand subscription provides 365 days of unlimited access to exclusive content and training videos.

The banner features an orange header with the Cloudera logo and navigation icons. Below the header is a dark image of a person working at a desk with multiple laptops. The text 'Cloudera OnDemand Training' is prominently displayed in white, followed by the subtitle 'Learn new skills in big data systems on your own time'. A 'Browse Courses' button is centered below the text. At the bottom of the banner, a white box contains the text: 'Own your future by learning the industry's most in-demand skills' and 'Specialized courses for developers, analysts, administrators, and aspiring data scientists taught by industry experts are now available here on Cloudera OnDemand.'
